Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals. To seek and maintain full-time position that offers professional challenges utilizing interpersonal skills, excellent time management and problem-solving skills.

PROJECTS

1. Web based - ADAS (Web Dev & ML): {Academic Project}

ADAS (Advanced Driver Assistance Systems) are safety features integrated into vehicles to assist drivers in avoiding collisions and accidents. These systems employ sensors, cameras, and AI algorithms to provide warnings, automate tasks like braking or steering, and enhance overall driving comfort and safety.

It includes features of Machine Learning , CNN , for calculating obstacle distance from the car / ADAS system and notify driver / sent alert if the distance is less or something is coming between the path.

[Github](#)

2. Web Developments :

Built a fully functional website from scratch using HTML, CSS, and JavaScript. Designed responsive layouts to ensure optimal viewing experience across various devices. Implemented interactive features such as image sliders and contact forms to enhance user engagement.

([PROJECTS](#)).

1. Tiles Business - [nstilestudio.com](#) ([Github](#))

3. Audio dictionary :

I spearheaded the creation of a Python-based Talking Dictionary for children, a dynamic educational tool that fosters language development through interactive audio experiences.

They can spell / read out loud or type words in the box and dictionary will pronounce the meaning of words in audio format.
